Subject: Can I use openvz in Ubuntu 7.04 for amd_64?
Posted by liuzhuankyzy on Fri, 08 Jun 2007 03:03:04 GMT

My OS is Ubuntu 7.04 for amd_64, and I have tried many different virtualization tools, such as qemu, virtualbox, in vain. So I wonder whether the OpenVZ could run smoothly in my OS.

Looking forward to reply...
Thanks for help.
