VE 89.149.221.89 and HN 84.16.233.207 all public IPs, assign from the provide.
And i just re-install the root-server at yesterday, same as OS images , IP's and config. Only different is openvz kernel version.
Old kernel 2.6.8-022stab078.10 on HN, And VE110 IP's 89.149.221.89 can working, install about one year ago. The root-server and VE can access to outside before re-install.
