My problem is with /dev/net/tun.
I'm using the notes on the forum which are located at
<http://forum.openvz.org/index.php?t=msg&goto=10389&>

According to the notes on the forum I need to setup /dev/net/tun using 3 commands.

```
# mkdir -p /dev/net  
# mknod /dev/net/tun c 10 200  
# chmod 600 /dev/net/tun
```

On my linux 2.6 system,
mkdir -p /dev/net returns error msg:
 mkdir: `/dev/net' exists but is not a directory
mknod /dev/net/tun c 10 200 returns error msg:
 mknod: `/dev/net/tun': Not a directory

vzctl did not work also.
I'm wondering how to get past these issues.
