Subject: rhel 3 and other 2.4 kernel based distros
Posted by dbailey on Tue, 12 Jun 2007 15:28:03 GMT

I see that virtuozzo lists rhel3 as a supported guest. I'm wondering if openvz has the same capabilities to support the various guests that virtuozzo can?

It's not particularly clear from the openvz website if 2.4 kernel based guests are expected to work with openvz. Since openvz is a basis for virtuozzo, and virtuozzo can handle 2.4 kernel based guests, it looks as though it should work. However I dislike running on assumptions when asking a question might save me several hours of wasted effort :)
