Hi Stefan,

are some ip6tables kernel-modules are loaded in VE0 (Hardwarenode) ?

Please print output of
VE0# lsmod | grep ^ip6

if no ip6tables are loaded, please load a minimal set in VE0:

```
VE0# modprobe ip6_tables
VE0# modprobe ip6table_filter
VE0# modprobe ip6table_mangle
VE0# modprobe ip6t_REJECT
```
