What do you mean saying "vzctl doesn't work"? Do you run OpenVZ kernel? Which one (`uname -a` output)? If vzctl doesn't work, you can't enter VE and therefore produce these commands (mknod ..., mkdir ...) in VE!

BTW, here is an article about TUN/TAP and VPN inside VE:
http://wiki.openvz.org/VPN_via_the_TUN/TAP_device

HTH,
Vasily
