Subject: *SOLVED* /proc/megaraid is missing
Posted by rbanffy on Thu, 14 Jun 2007 13:34:20 GMT

Hi folks.

I am running a CentOS 4 install with the OpenVZ kernel (2.6.9-023stab043.2-smp #1 SMP Fri Mar 9 11:50:20 MSK 2007 x86_64 x86_64 x86_64 GNU/Linux) on a Dell PowerEdge 1900 with megaraid_sas array (PERC 5/i, according to /proc/scsi/scsi), there seems not to be a /proc/megaraid where statistics and status information should be available.

Since the machine boots from the array, I suppose everything should be in place for it to work properly.

Is this a genuine bug or is it that I am doing something very wrong?
