This post is for information to the community.

Milind provided me an access to the node, and we found that there is in fact a problem with user quotas in VE on 2.6.9-based OpenVZ kernels.  
The bug #632 ([http://bugzilla.openvz.org/show\\_bug.cgi?id=632](http://bugzilla.openvz.org/show_bug.cgi?id=632)) was reported.

Thanks to Milind.
