Jan,

it looks like the following fix:

[http://git.kernel.org/?p=linux/kernel/git/torvalds/linux-2.6
.git;a=commitdiff;h=43c3e6f5abdf6acac9b90c86bf03f995bf7d3d92](http://git.kernel.org/?p=linux/kernel/git/torvalds/linux-2.6.git;a=commitdiff;h=43c3e6f5abdf6acac9b90c86bf03f995bf7d3d92)

was lost after resurrecting of the spliced checkpointing list in this patch:

[http://git.kernel.org/?p=linux/kernel/git/torvalds/linux-2.6 .git
;a=commitdiff;h=78ce89c92bc6eaf5933b5664bff64253a7103bd7;hp=
cdaad343b561cdeb38b0578bb038](http://git.kernel.org/?p=linux/kernel/git/torvalds/linux-2.6.git;a=commitdiff;h=78ce89c92bc6eaf5933b5664bff64253a7103bd7;hp=cdaad343b561cdeb38b0578bb038)

Can you please confirm that?

Thanks,
Kirill
