ugo123 wrote on Tue, 03 July 2007 00:13Ok, now I remember why source routing wasn't working
:

mercury:~# /sbin/ip rule add from 87.98.196.137 table 10
mercury:~# /sbin/ip route add default dev eth0 via 87.98.196.129 table 10
RTNETLINK answers: Network is unreachable
mercury:~#

This is simply means that Hardware Node does not know how to get to 87.98.196.129. Could you
please try again with:

ip route add 87.98.196.128/26 dev eth0
ip rule add from 87.98.196.137 table 10
ip route add default dev eth0 via 87.98.196.129 table 10

This should eliminate the "Network is unreachable" error.
