sorry you not right !
i have image Opensuse 10 for vps
my host run centos4.2

sample

after i crete the vzctl create 151 --ostemplate open-suse-****

vps create perfect

vzctl set 150 --ipadd *****

i try ping

the ip not respond !

bad

ok so i try using vzctl enter 151

to find the issue

i use yast

not network device

the main issue here Opensuse is not ready to support vps network device not show
like fedora or centos image

Please Help me ASAP Regards !!!!!!!!!!!
