Im trying to restart a VE from crontab. But I get "operation timed out" everytime.

```
* /2 * * * * /usr/sbin/vzctl restart 666 >>/tmp/log 2>&1
```

```
cat /tmp/log
```

```
Restarting VE
```

```
Stopping VE ...
```

```
Unable to stop VE: operation timed out
```

I have tried "vzctl stop" with the same results. But "vzctl start" works.
If I run it from normal shell it works.

Any ideas?
