yea that appears to be the problem:

```
 cat /proc/vz/vzquota
qid: path        usage     softlimit    hardlimit     time     expire
1000: /vz/private/1000
 1k-blocks      7851856   10000000000   15000000000        0        0
   inodes       200000      200000       220000 1183470760       0
```

I'm making preparations for the 4th of July =) so I'll try it later

Thanks for your help!
