mephisto wrote on Wed, 08 February 2006 18:13Hi,

I've just successfully installed OpenVZ 025.014 on Gentoo (vzquota 2.7.0.7, vzctl 2.7.0.26). My test vps (centos 4.2) boots and network ist working. If I run vzcpucheck however, I get the following error:
Can't read /proc/fairsched: Permission denied
What's missing?

a little more attention reading announcement

http://openvz.org/news/updates/beta-kernel-025stab014.1-rele ased says this:

Quote:fair CPU scheduler is currently not implemented. It is a work in progress and will be avaiable in the following releases
