Hi Gustavo,

you can use the prebuild and/or source package of vzctl from <http://debian.systs.org/>

direkt link: <http://debian.systs.org/debian/pool/openvz/v/vzctl/>

or add to apt/sources.list:

deb <http://debian.systs.org/> etch openvz

Btw, this linux-kernel is outdated, it's a build with OpenVZ patch 028test018.1, the new stable kernels are build with patch 028stab035.1.

On debian repro at [debian.systs.org](http://debian.systs.org) linux-image builded with offical OpenVZ kernel-config are avail, too.

(See info at [http://wiki.openvz.org/Installation\\_on\\_Debian#precompiled\\_kernel\\_images\\_at\\_debian.systs.org](http://wiki.openvz.org/Installation_on_Debian#precompiled_kernel_images_at_debian.systs.org) )
