Subject: Re: vzctl 3.0.18 for debian? Posted by ggonzalez on Thu, 12 Jul 2007 13:23:04 GMT View Forum Message <> Reply to Message

Thanks for your prompt reply.

When you say:

"Btw, this linux-kernel is outdated, it's a build with OpenVZ patch 028test018.1, the new stable kernels are build with patch 028stab035.1.

Are you referring to the kernel I am currently using, or to the kernel I would be downloading from the URL you mentioned?

Best regards, Gustavo.
