In case this helps, I've got Network unreachable error as follows:

```
[root@host06 ~]# vzctl set 601 --ipadd xxx.yyy.247.151 --save
Adding IP address(es): xxx.yyy.247.151
SIOCADDRT: Network is unreachable
Configure meminfo: 49152
Saved parameters for VE 601
[root@host06 ~]#
```
