Hello,

If you give

```
# sysctl -w net.ipv4.conf.eth0.proxy_arp=1 and after that start the VE:
```

```
# vzctl start 101 you should not see this warning.
```

numothersock - this is the number of other (other than tcp) sockets in VE. More information at <http://wiki.openvz.org/Numothersock#numothersock>

HTH,

Vasily
