---

When using vzyum (with any command... update, install, whatever), I get this as an error:

```
/usr/share/vzpkgtools/vzrpm44/lib/python2.3/site-packages/rp m/_rpmmodule.so: cannot handle  
TLS data
```

I can't find any answers anywhere about it. I've been looking for about an hour on Google and on the forums here.
