---

Hi @ all,

I have to backup all my Data today because of HDD errors.

I tried to backup every partition by using tar.

I get the following errors:

...

tar: ./lib/vz/private/101/var/spool/postfix/private/virtual: socket ignored

tar: ./lib/vz/private/101/var/run/cgisock: socket ignored

tar: ./lib/vz/private/101/dev/log: socket ignored

...

Will my VE work after extractig the archiv?
