Hi there,

I'm very impressed by OpenVZ and I'm thinking of consolidating my Linux OS's which are on VMWare to OpenVZ. This because of the lack of speed I'm experiencing. One of the things I need to overcome is the migration of IPCop v1.4.16 to OpenVZ. I'ven't found an IPCop image between the OS images on Openvz.org. Wouldn't it be great if IPCop would be available as a template? Are there any people arround that fee the same or are there perhaps any already engaged in developing such a template? I would be really interrested!

Regards,

Marc
