Subject: Running X server in VE
Posted by marc1911 on Sat, 04 Aug 2007 09:33:11 GMT

Hi there,

I'm trying to get Alfresco (Document Management System) up and running in a VE. The problem I'm facing now is that is uses OpenOffice to do some background actions when checking in a document. OpenOffice needs a X server to work. Does anyone know a good howto to get an Xserver running in a VE?

Regards,

Marc
