I've done some more testing and I can't find any reason why I'm receiving this errors. When I give the command locale -a, the same errors come up. When I give the command in the host, these errors do not appear.

```
locale: Cannot set LC_CTYPE to default locale: No such file or directory
locale: Cannot set LC_MESSAGES to default locale: No such file or directory
locale: Cannot set LC_ALL to default locale: No such file or directory
```

There must be missing some files, but which? Anyone?
