Subject: Re: Problem with language settings in a VE (*SOLVED*)
Posted by vaverin on Tue, 07 Aug 2007 13:56:50 GMT

rpm -qf /etc/sysconfig/i18n
file /etc/sysconfig/i18n is not owned by any package

As far as I understand this file copied from HW node into template.

Therefore it's interesting to know the following:
- what distribution is installed on your HW node?
- could you please show /etc/sysconfig/i18n from your HW node?
- could you please describe how you installed CentOs 4 template?

thank you,
    Vasily Averin
