Subject: Re: OpenVZ on CentOS 5 network issues
Posted by locutius on Mon, 13 Aug 2007 22:54:02 GMT

24 hours on the OpenVZ forum ... no progress

i sent a mail to sales@openvz.org offering to buy a support package ... no reply

i will ask the host to install CentOS 4.5 and see if the same problem happens again - a default installation of OpenVZ creating a VE without network connection

i will keep you informed, and this topic at the top of the forum until a dev or mod shows up
