Steve,

Thanks for building this package. I know I'm the one who originally asked for it (in this forum topic thread anyway)... but I just got around to trying your vztmpl-centos-5 package out. I installed it on a RHEL 5 system and when I tried to build a centos-5 template cache I got the following error messages:

Transaction Check Error: file /sbin/insmod conflicts between attempted installs of dummy-centos-5-1.0-4.swsoft and module-init-tools-3.3-0.pre3.1.16.0.1.el5
  file /sbin/insmod.static conflicts between attempted installs of dummy-centos-5-1.0-4.swsoft and module-init-tools-3.3-0.pre3.1.16.0.1.el5
  file /sbin/lsmod conflicts between attempted installs of dummy-centos-5-1.0-4.swsoft and module-init-tools-3.3-0.pre3.1.16.0.1.el5
  file /sbin/modprobe conflicts between attempted installs of dummy-centos-5-1.0-4.swsoft and module-init-tools-3.3-0.pre3.1.16.0.1.el5
ERROR: yum failed with 1 exit code

Darn the luck.
