I put those to <http://download.openvz.org/template/precreated/contrib/>

But why those files are so big compared to same i386 packages? Can you check it?

121M centos-5-i386-default.tar.gz
43M centos-5-i386-minimal.tar.gz
321M centos-5-x86_64-default.tar.gz
122M centos-5-x86_64-minimal.tar.gz
