if i ssh to the VPS i land in the HN

if i browse the httpd of the VPS i see the HN homepage

iptables is stopped on both the HN and the VE

but if issue the command service iptables stop on both systems this is the response:

```
Flushing firewall rules:                        [  OK  ]
Setting chains to policy ACCEPT: mangle filter        [  OK  ]
Unloading iptables modules:                 [FAILED]
```
