As far as I understand VPS101 have IP 85.17.182.205.  
Could you please confirm that you have not used this IP on HW node?

locutius wrote on Wed, 15 August 2007 08:46if i ssh to the VPS i land in the HN

if i browse the httpd of the VPS i see the HN homepage

I would like to clarify: from which node did you connect to VPS? from HW node or from some other host?
