Sure. Here it is.

This patch should apply cleanly against 2.6.8-022.064.  
OpenVZ-2.6.8-022.064-no-module-support.diff

If you're running into an error message about `check_stack_overflow` (as I've done because of my self-created `.config`) have a look at bug #96

My "test most OpenVZ as modules or compiled in"-test is mostly successful. If you can find any errors, please let me know.

HTH,  
Steffen
