Subject: Beancounters
Posted by IanMur on Thu, 16 Aug 2007 18:14:52 GMT

Hi,

Sorry if this information is somewhere is obvious or somewhere 'in the manual', but if not...

Could someone please tell me if the beancounter 'fails' get logged beyond the /proc/... summary... a la the QoS logs in Virtuozzo power panel for VPS owners?

Also, how can I reset the 'fails' counters in the /proc/..?

Thanks in advance,

Ian.
