i do NOT want to restart the VPS on crond

the problem is when a VE root wants to reboot his VPS and he enters 'reboot' into ssh then the VPS stops but does not restart

i searched the forum and found this thread

http://forum.openvz.org/index.php?t=msg&goto=12775&&srch=ve+not+rebooting#msg_12775

i will say the problem again so we are clear: ssh reboot stops the VPS and the VPS fails to restart
