Subject: Re: Strange performance issue Posted by vaserv on Mon, 20 Aug 2007 21:35:39 GMT View Forum Message <> Reply to Message

Everyone has the same CPUUNITS/CPULIMIY so as I understand it everything should be equal. Just going to an extreme though

[root@vz26uk ~]# vzctl set 881980 --cpulimit 10000 --cpuunits 480082 Setting CPU limit: 10000 Setting CPU units: 480082 Configure meminfo: 262144 WARNING: Settings were not saved and will be resetted to original values on next start (use --save flag) [root@vz26uk ~]# vzctl exec 881980 "time perl -e 'sqrt(100) for (0..1000000)'" real 0m2.971s user 0m2.934s sys 0m0.034s

No change (BTW this node is running hypervm so those limits are set via that but I take what you are saying.) Its just this one VPS out of 700 or so that is playing up which I'm finding weird all with very similar settings
