make sure that you have the following options enabled in your .config file:

CONFIG_USER_RESOURCE=y

CONFIG_USER_RSS_ACCOUNTING=y

CONFIG_UBC_IO_ACCT=y

CONFIG_USER_SWAP_ACCOUNTING=y

CONFIG_USER_RESOURCE_PROC=y

compilation fail - not normal, you can fill in the bug with .config file you used.

OVZ patches includes not only 2.6.18.8 fixes, but many other mainstream fixes to make sure your whole system works stable.

Thanks,

Kirill
