Subject: SOLVED Re: max number of VE Posted by yahbluez on Thu, 30 Aug 2007 12:53:59 GMT View Forum Message <> Reply to Message

Thx kir,

the newest kernel in this rep is: 2.6.18-028stab035.1-ovz-smp #1 SMP Wed Jun 13 21:52:27 CEST 2007 x86_64 GNU/Linux

With that kernel the bug did not apear. Im able to run 100 VEs.

So no need for me to switch to centos on the host.

where may i found the sources of this kernel tree?

thanks again for your quick assistance.

with best regards yahbluez
