[HN]# ip a l

...

1: venet0: <BROADCAST,POINTOPOINT,NOARP,UP> mtu 1500 qdisc noqueue
link/void

...

Well, you see venet is not an ethernet device, and in particular it doesn't allow arp packets to go through it (NOARP flag), so it's ok to stay venet0.proxy_arp 0, this shouldn't influence on the system in any case.
