Wanted to check if we have a consensus on following three patches and see if we are ready to send them to akpm and LKML.

<http://www.sr71.net/patches/2.6.18/2.6.18-rc6-mm2/2.6.18-rc6-mm2-lxc1/broken-out/pid-namespace-rename-namespace-to-pid-namespace.patch>

<http://www.sr71.net/patches/2.6.18/2.6.18-rc6-mm2/2.6.18-rc6-mm2-lxc1/broken-out/pid-namespace-add-pid-namespace-to-nsproxy.patch>

<http://www.sr71.net/patches/2.6.18/2.6.18-rc6-mm2/2.6.18-rc6-mm2-lxc1/broken-out/pid-namespace-add-child-reaper-to-pid-namespace.patch>

For the last patch add-child-reaper-to-pid-namespace, there was discussion on how to implement killing all processes in a pid-namespace when the reaper dies, but can we address that in a follow-on patch ?
