Hello,

it seems that i found a small bug on the new vzquota package.
The actual version of vzquota identifies itself as version 2.5.0.

```
$ vzquota -V  
Vzquota version 2.5.0
```

on the RPM system its correctly identified as version 3.0.0-2

```
$ rpm -qa | grep vzquota  
vzquota-3.0.0-2
```

so far...
