An updated version with hopefully all of the fixes applied and merged
based into the proper patches and against against 2.6.21-rc6 is available at:

[git://git.kernel.org/pub/scm/linux/kernel/git/ebiederm/linux-2.6-netns.git](http://git.kernel.org/pub/scm/linux/kernel/git/ebiederm/linux-2.6-netns.git)

After finally getting the sysfs support back under control I have finished
rebasing my original patchset.

Eric
