Hello,

If you start your gentoo-vps, are there any errors shown?

What does vzlist show, after you've run vzctl VPSID start?

I can make a archive of my gentoo-vps, if you want to try with it, but at the moment, there is a problem with disk quota, as it says, that there is no space left on device.
If I check the free space with df, it says, there are 4GB left on device!?!

HAND,
Steffen
