Subject: Re: Server refused to allocate pty
Posted by devnu11 on Wed, 05 Oct 2005 06:30:42 GMT

Swdev was kind enough to assist me in #openvz and I was able to correct the problem. I am adding what I did as a reference for someone else.

vzctl exec 101 /sbin/MAKEDEV tty

then

vzctl exec 101 /sbin/MAKEDEV pty

This solved the problem and I can log in as before. I believe udev was updated from a "yum update" and caused the problem.

Thanks again swdev
