
Subject: [-mm PATCH 6/7] Memory controller add per container LRU and reclaim
Posted by [Balbir Singh](#) on Wed, 04 Jul 2007 22:22:34 GMT

[View Forum Message](#) <> [Reply to Message](#)

Add the meta_page to the per container LRU. The reclaim algorithm has been modified to make the isolate_lru_pages() as a pluggable component. The scan_control data structure now accepts the container on behalf of which reclaims are carried out. try_to_free_pages() has been extended to become container aware.
