Well, apparenntly you guys are planning some "container" stuff that is on top of or relates to in some way unclear to me with Menage's containers and/or cpusets.

I'll repeat my question a third time ... not knowing any clearer way to state it than before, I'll just quote myself:

- > So ... will you (those using the netns patches) be using Paul Menage's
- > containers, or competing with them for the same ends, or what?

- > To repeat my original question, what is the relation between the work
- > described on this thread (which some OLS discussions have decided to
- > base on the netns patches) and Paul Menage's containers and my (now the
- > community's) cpusets.

I won't rest till it's the best ... Programmer, Linux Scalability Paul Jackson <pj@sqi.com> 1.925.600.0401
