Well, apparenntly you guys are planning some "container" stuff
that is on top of or relates to in some way unclear to me with
Menage's containers and/or cpusets.

I'll repeat my question a third time ... not knowing any clearer
way to state it than before, I'll just quote myself:

> So ... will you (those using the netns patches) be using Paul Menage's
> containers, or competing with them for the same ends, or what?
>
