Subject: Re: 64Bit CPU Required for high RAM OpenVZ Servers? Posted by dev on Mon, 13 Mar 2006 12:05:57 GMT View Forum Message <> Reply to Message

Additional comment: if you want to run 32bit apps/VPSs it is recommended to use 32bit OS.

Use 64bit only when you understand what you need and what you do why? because, 32bit applications work not that perfectly on 64bit OS, and though almost all apps work, some of them don't.
