Ok the last snapshot of my tree is at:

[git://git.kernel.org/pub/scm/linux/kernel/git/ebiederm/linux-2.6-netns.git](https://git.kernel.org/pub/scm/linux/kernel/git/ebiederm/linux-2.6-netns.git)
And tagged as: netns/v2.6.23-rc5netns45

Although that is the same as the default HEAD until I rebase my tree again.
