Subject: Re: difference between /vz/private/ and /vz/root/ ?
Posted by vaverin on Wed, 19 Sep 2007 06:02:29 GMT

Hi Alex,

/vz/private/<VEID> are private areas, i.e. the directories containing the private files of the given VEs.

/vz/root/<VEID> -- are mountpoints. The private area is mounted to the /vz/root/<VEID> directory on the Hardware Node and provides VE users with a complete Linux file system tree.

If you want to move VE files from HN to some other place it's better to avoid /vz/private using and handle /vz/root directory.

thank you,
Vasily Averin
