Hi,

I suggest you start using relevant titles for your posts. We mostly receive notifications by e-mail when a new topic is created, and when it is a topic from you, we have to go to the forum every time because we don't know if we can answer your question or not just by the title. Anyway, it is always good practice to have relevant subject when you ask a question.

I also suggest you try to avoid typos. It took me a while to figure out what you meant by 'cup' (CPU).

Your answer is in the user's manual:

<http://download.openvz.org/doc/OpenVZ-Users-Guide.pdf>

Look at the content table, there is a complete chapter on resources management.

BTW, it would be a good idea for you to read this document cover to cover. I did it and it is very interesting.

Regards,

Ugo
