Upgraded to stable fecore.

Beta works

sound broken

Title

Information - artsmessage

Message

Sound server informational message:

Error while initializing the sound driver:

device /dev/dsp can't be opened (No such file or directory)

The sound server will continue, using the null output device

, anything else?

Is patch suitable for vmlinuz-2.6.15-1.1955_FC5hypervisor (good to keep Xen fallback) (Vanilla)?

Can't afford coolthreaded at the moment.

Output before and after commenting python:

```
[root@localhost ~]# vzpkgcache
```

```
Creating cache for fedora-core-4-i386-default OS template
```

```
There was a problem importing one of the Python modules  
required to run yum. The error leading to this problem was:
```

```
/usr/share/vzpkgtools/vzrpm44/lib/python2.4/site-packages/rpm/_rpmmodule.so: wrong ELF  
class: ELFCLASS32
```

Please install a package which provides this module, or
verify that the module is installed correctly.

It's possible that the above module doesn't match the
current version of Python, which is:

2.4.2 (#1, Feb 12 2006, 03:45:41)

[GCC 4.1.0 20060210 (Red Hat 4.1.0-0.24)]

If you cannot solve this problem yourself, please send this message to <yum@lists.linux.duke.edu>.

ERROR: yum failed with 1 exit code

Creating cache for fedora-core-4-i386-minimal OS template
