## Subject: Re: vzpkgcache issues on amd64
Posted by kir on Mon, 20 Mar 2006 06:43:27 GMT

I can suggest several workarounds

(1) Use precreated templates, so you will not need vzpkgcache at all.

(2) Modify cache-os script as it was described somewhere here at the forum (use search). That way it will use host system's rpm. The downside is you will only be able to use the same version of rpm in VPS as you have on the host system.
